M (B) 5-12  
W (D) 5-12  
WW (EE) 5-12

# Pedorthic Modifications

**Heel and toe rocker sole**

This rocker rolls at both the heel and toe while keeping a level mid-stance area for balance. It assists with energy transfer and delays heel strike causing a longer stride.

**Full length rocker sole**

Full rocker offers a continuous roll from heel to toe. Not suitable for those with balance issues.

**Negative rocker sole**

Forefoot rocker with the heel lower than the forefoot. Transfers body weight proximally and reduces forefoot pressure. Dorsiflexion and Achilles issues must be considered.

**Leg length DISCREPANCY buildup**

Lifts the shoe for those with a difference in leg length, reduce strain on joints muscles and other structures. Generally height at the metatarsal heads is scaled to 2/3 of the heel height.

**Buttress**

Used to stabilize the ankle, can be either on the medial or lateral side. Supports the foot and widens the base of support to help control abnormal motion

**Heel Raise**

Heel raises indicated for Equinus or Achilles tendonitis issues. Sometimes used for small LLDs. Increased pressure on the forefoot should be considered.

**Flare**

Increases stability of the shoe and gently forces the foot away from the modified side.

**Wedge/Tilt**

Used to improve the bio mechanics of the foot and leg and reduce stress on the joints. Can be applied medially or laterally.

## Diabetic Socks

**Fibre from Bamboo:** Made of fine Bamboo yarn to eliminate moisture, supporting cool, dry feet.

**Moisture Absorption:** Another component that adds to the moisture-eliminating process is the absorption fibre in diabetic socks. This integrated fibre within the socks helps to naturally remove moisture and assure fresh circulation to help eliminate odour. Superior to cotton, hemp, wool, and synthetic fabrics, no other material can match the breathability of Bamboo.

**Antibacterial:** These Bamboo diabetic socks are also antibacterial and fight off bacteria that cause fungus. Feel and be fresher in these organic socks.

**Hypoallergenic:** Because Bamboo is collected and formed into these socks, they are naturally hypoallergenic. The Bamboo is not treated with any chemicals, therefore is much safer and better to use with any skin condition. Fantastic for those who have sensitive skin, great for everyone.

**Durability:** Our socks are not made from cotton, wool, or traditional fabric materials. Bamboo socks are incredibly durable and are easier to maintain. The bamboo material does not shrink nor become loose when compared to conventional socks. So easy to maintain. Simply machine wash and dry.

**Sustainability:** Wear your bamboo socks, knowing that you are using a renewable material that is environmentally friendly. With sufficiently less water is needed to produce, you are helping save the world's most crucial resource while simultaneously enjoying the superior product.

**Amputee Socks:** We have designed a collection of socks specifically tailored for individuals who have undergone a transmetatarsal amputation procedure.
